

3 Courses

Programming Generative AI: Foundations

Programming Generative AI: Image and Language Models

Programming Generative AI: Multimodal AI and Model Customization

May 19, 2026

Pearson

Mohamed Mustafa Mohamed

has successfully completed the online Specialization

Programming Generative AI

This certifies that the recipient has successfully completed a comprehensive, hands-on course in building multimodal generative AI systems. Under the instruction of expert Jonathan Dinu, the recipient demonstrated proficiency in deep generative modeling using PyTorch and the Hugging Face ecosystem. The curriculum covered foundational concepts through advanced applications, including text-to-image generation and model personalization. The recipient acquired practical experience in data manipulation, neural network training, and fine-tuning large pre-trained models, equipping them with the skills necessary to design and implement innovative AI systems capable of understanding and generating both text and images.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
